HYDRAULIC WOOD SPLITTER HYCD "JOHN"

The hydraulic wood splitter "JOHN" is meant for splitting firewood of a length of up to 500 mm. In case the working table is removed, firewood of a length of up to 1000 mm can be splitted. These splitters are made with their own pump on the universal drive, a pump on the electro motor or we connect it to the tractor pump. Start is two-handed, retraction of the cylinder automatically.

	HYCD 10 EM	HYCD 10 K
delamination load	10 t	10 t
cylinder stroke	500 mm	500 mm
Drive	Electro motors	cardan
split length	500/1000	500/1000
start	two-handed	two-handed
weight	160 kg	150 kg
